State University Of Bangladesh

Department of Computer Science and Engineering

- A numeraire portfolio that is self-contained is considered to someone as a portfolio.
- In finance, its value is always positive and never zero.
- Each object on the list will be returned according to the numeraire-dominated rate's best conditional forecast.
- The numeraire portfolio is built if and only if there are no profit chances.

4. CONCLUSION AND FUTURE WORK

5. Greetings

INTRODUCTION

- A personal portfolio is a legal system that describes both qualitative and quantitative data.
- It differs from a resume in that its goal is to educate rather than to summarize elaborate on and produce evidence for accomplishments, abilities, and experiences gained in the classroom and in work and perhaps In the moment, the portfolio is the most important requirement.
- This is the virtual and online world , It is really a reworked version of my course.

INTRODUCTION

- The portfolio often includes all of the projects, research, and other creative work.
- In today's world, a portfolio appears to be extremely beneficial.

- Niamul Hasan, Tania AKter, and Sakib U. Zaman. "Developing an Portfolio website." 2018 International Conference on Microelectronics, Computing and Communications (MicroCom). IEEE, 2018.

PROPOSED METHODOLOGY

- The entire development process has been subdivided into two: the front end development and the backend development.
- The front end comprises of the visually visible parts such as the home page, admin panel, contact page, shopping cart page.
- The back end contains the database and its interaction with the front-end.

PROPOSED METHODOLOGY

- The front end of our website was initially raw coded using JavaScript.
- This is a client side scripting language which is a dedicated language for web development.
- The code was mixed with the Hypertext Mark-up Language (HTML) to create a style sheet (CSS) language used for describing the look and formatting a document written in a mark-up language.
- We also introduced bootstrap program in our application which supports creation of animations.

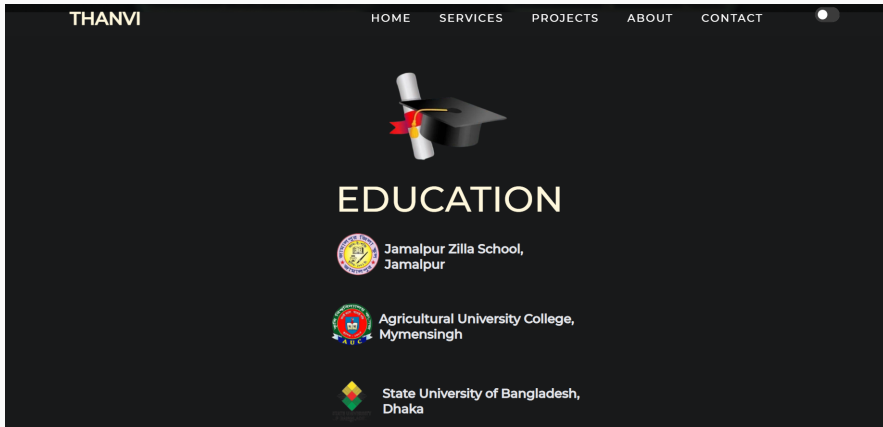

Figure 1: General Mood

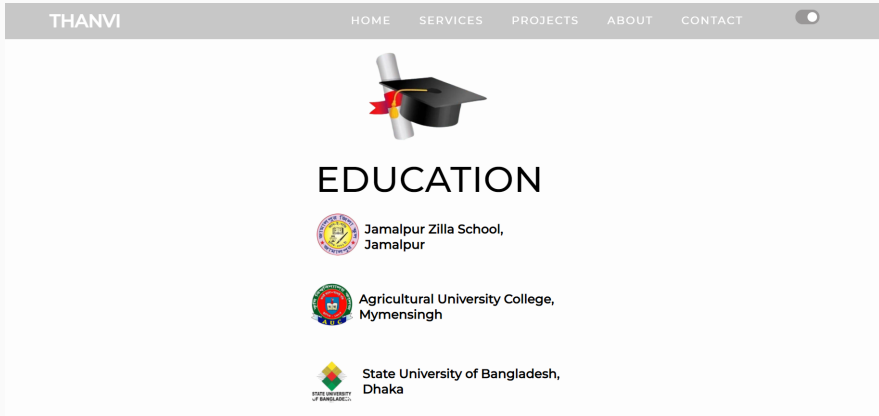

Figure 2: Dark Mood

PROPOSED METHODOLOGY

- The Database Management System (DBMS) provides support for the back end.
- The database management systems essentially software where we can create the database, add, drop, alter and update tables.
- In our application we have chosen the MySQL DBMS to hold the database.
- MySQL is a relational database management system.
- The main reason is MySQL development project has made its source code available under the terms of the General Public License (GNU) which is an open source web application.

CONCLUSION AND FUTURE WORK

- An online portfolio looks to be highly useful in today's society.
- My resume has been revised in this edition.
- All of his projects, research, and other creative activities are generally included in his portfolio.
- An online portfolio is the most effective tool for creating an online portfolio.

Greetings
